

Mucrone

Video project

Artistic concept:

Aziz Cecho, Michele Fontana & Cittadellarte-Fondazione Pistoletto

With the participation of:

Michela Silvestri

Duration of video: 7 minutes 35 seconds

Category: documentary film

Subject:

To speak of the mountains of Oropa, and the cable cars. To tell, through the eyes of those who live and love these places, the stories and tensions that run through them Michela Silvestri first began to walk in the mountain with her grandmother, she managed the cable car bar of Oropa, and now works for a local television network.

This video aims to try to overcome the ordinary interview or documentary, trying through Michela Silvestri's direct participation in all the stages of production, to realise a video with her and not about her. The hope is that of sharing and telling a point of view on a territory.
